φ 14.3 Carbon shaft specially designed for BC ski.

slipless top

#OS17-017BK

Black

φ 16 Aluminium

φ 14.3 Carbon

length: 100~130cm
weight: 290g

Operate binding easily using hook of the grip & tip.

- release bindings
- change the modes
- ON/OFF of climbing supports
- release buckles

Different ways of gripping in different situations

Steep Slope

Gain boost by placing whole palm on the top of grip.

Gentle Slope

Standard way to grip (Same as skiing).

Traverse

Useful non-slip rubber under the grip.

Pole Position for Japanese Expert

SINANO COMPANY, established in 1919, has been a leading manufacturer of high-quality ski poles in Japan for almost 100 years. We have the largest share of the ski pole at domestic market, and plenty of skiers has recognized our products as reliable top-quality ski poles.

In recent times, we also deal with production and selling of trekking poles, welfare canes and walking poles.

Quality of "MADE IN JAPAN"

SINANO has own production factory. Rather than mass production, SINANO has controlled product quality by every single product in order to keep quality of "MADE IN JAPAN".

Innovation on customer demands

Voice of Customer (VOC) is our motivation to improve and innovate our products. In fact, SINANO has plenty of megaseller products innovated by referring to VOC.

Manufacturing

Selling

From designing to manufacturing & selling

What distinguishes SINANO from its competitors is a commitment to covering the entire value creation chain - from the first phase of designing, development, testing and selling.

Support

We regard courteous service as our priority to build a relationship of trust with customers and business partners. Our international staff can respond quickly to your questions and requests.

Customer satisfaction
