

OH MY GOODNESS!!

Mr. Professional!!
There are so many types of walking pole.
I cannot choose which one is better for me!

SHAKE SHAKE

SAKI

Mr. Professional

thinking.....

GOT IT!!

WOW!
Eyeglasses is shining!

I will tell you...

SINANO has two different types of walking pole.

One is for **exercise**

The other is for **fall prevention**

Exercise? Fall prevention?
I need more information!

The model for exercise
Walk firmly/Whole body exercise

- ✓ Increase energy consumption
- ✓ Widen walking stride
- ✓ Muscular training

The model for fall prevention
like using two walking canes

- ✓ Stability walking
- ✓ Keep your walking balance
- ✓ Make good posture
- ✓ Relieve pain from Knee and waist

In short,
I recommend exercise model to people who want to work out.

I recommend fall prevention model to people who feel anxiety about walking.

Hey SAKI!!
Which models do you prefer?

I choose exercise model!!

I see...
At first, we choose from two types.
That is easy for us!!

Thank you Professional TSUBOI

The shape of rubber tip of exercise model and fall prevention model is different. The rubber tip of **exercise model is round shape**, on the other hand, **fall prevention model is flat** like walking canes.

round flat
